

...TO YOUR HOME

Flexibility

These pavers can be installed using sand set methods making them ideal for any outdoor setting. Whether it's a residential or commercial property, you can create beautiful surfaces with superior quality and durability. If you're looking to make a statement, look no further as a diverse range of colors and finishes are available to assure a solution suitable to your needs.

Affordability

Until recently, the cost factors involved with natural stone installations were outside the typical homeowners market. Now with the introduction of thick travertine pavers, these costs are greatly reduced, making a natural stone driveway, pool deck, or walkway affordable for anyone considering Chicago brick or stamped concrete.

Installation

We import the finest stone pavers directly from the quarries of Europe. Our team of experienced installers assures a timely and professional job from start to finish. Please contact us for a free estimate and design consultation.

INTRODUCING

Mediterranean Pavers

FROM THE QUARRIES OF EUROPE...

Why install an imitation when
you can install real stone?

Ageless Beauty

Throughout history, travertine marble has lined the streets and walkways of ancient cities. This ageless beauty is now available and affordable to bring into your own home with results that last a lifetime. Natural stone is resilient to both temperature and daily wear becoming more attractive with time. The natural beauty of these pavers is impossible to duplicate using man made processes.

No two instalations will be exactly the same,
leaving you with a one of a kind work of art.
