Wedding Photography

When it comes to remembering your special day, you want pictures that you can cherish forever. You can't trust just anyone to capture these memories. Creamer Graphics & Photography gives you peace of mind by providing unforgettable photographs that will last a life time.

At Creamer Graphics we have over 10 years of photography experience that ensures your special day will be saved forever. We use the latest digital technology to ensure the best pictures will be in your photo album. We currently use all Nikon digital cameras to guarantee clear, dependable and professional photos every time. Creamer Graphics offers you experience you can trust. We are more than happy to provide references upon request

Creamer Graphics & Photography offers you CD-roms of all the images of your wedding. This gives you the freedom to distribute them as you wish, as well as pick the photo-processing of your choice. You save money by printing only the pictures that you want printed. Our affordable wedding package is designed to help the newly married couple be good stewards of their money.

Another reason we can offer such reasonable rates is, we specialize in stock photography, and occasionally there will be a shot or two that we can use for our advertising and marketing business. At times advertisers need beautiful wedding photos, and yours might be the perfect one.

If you like what you see in the photos, please let us help you capture your own treasured moments.
